PROJECTS

Work Evaluation Management System

📅 11/2021 - 12/2021 📍 Telerik Academy, Remote

🔗 <https://gitlab.com/a6396/peer-review>

A web application, which helps one organization to achieve high quality of their products and services.

Technology: JAVA, Spring, Hibernate, SQL, Thymeleaf, HTML, CSS

- The workflow is usually the following: user submits some work (code, documentation), assigns a reviewer, the reviewer can comment, approve, request changes, or decline the work item. Once the reviewer approves the work item it is marked as complete. The system should allow submitting work items, assigning other user as reviewer. The reviewer can add comments, request additional changes, approve, or decline the work item.

Freight Forwarding Management System

📅 09/2021 - 11/2021 📍 Telerik Academy, Remote

A web application that serves the needs of a freight forwarding company.

Technology: JAVA, Spring, Hibernate, SQL, Thymeleaf, HTML, CSS

- DeliverIT has two types of users - customers and employees. The customers can track the status of their parcels. The employees have a bit more capabilities. They can add new parcels to the system group them in shipments and track their location and status.

Task Management System

📅 08/2021 - 09/2021 📍 Telerik Academy, Remote

A web application for small IT team.

Technology: JAVA

- Tasks Management is application used by small team of developers, who need to keep track of all tasks, bugs, members and board with active history.
